DETAILED ACTION

This action is in response to the Application filed on 17 February 2004 in which claims 1-18 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Suiya Wang (U.S. Patent No. 6,312,293).

Regarding claims 1-2 and 9, Wang teaches a slim phone jack (figs. 1-8) for a phone plug with a spring arm, the slim phone jack comprising: an upper cover with a plurality of contact terminals to couple to a plurality of corresponding contact terminals of the phone plug; two sidewalls coupling to two sides of the upper cover, the two sidewalls forming a sliding tunnel allowing the phone plug to couple with the slim phone jack conveniently; and a lower cover coupling to the two sidewalls, wherein the lower cover comprises a guiding slot (fig. 7) formed by an opening.

Regarding claims 3-6, Wang teaches the slim phone jack of claim 1, wherein the spring arm (RJ-45) sticks out of a surface of the lower cover by way of the opening.

Regarding claims 7-8, Wang teaches the slim phone jack of claim 1, wherein the slim

phone jack further comprises: at least one fixing stud (16) for fixing the slim phone jack on a printed circuit board; at least one fixing foot (outside of 32) for fixing on the printed circuit board; and a plurality of signal transmitting feet (32) for coupling to circuits of the printed circuit board to transmit signals.

Regarding claims 10-11, Wang teaches a slim phone jack (figs. 1-8) for a phone plug with a spring arm, the slim phone jack comprising: an upper cover with a plurality of contact terminals to couple to a plurality of corresponding contact terminals of the phone plug; two sidewalls coupling to two sides of the upper cover, the two sidewalls forming a sliding tunnel to allow the phone plug to couple with the slim phone jack conveniently; a lower cover coupling to the two sidewalls, wherein the lower cover comprises a guiding slot formed by an opening; and a printed circuit board coupling to the lower cover, wherein the printed circuit board further comprises a fixing slot (corresponds to 16, 32).

Regarding claims 12-18, see the rejection of claims 3-8.
